N3IC Field Day 2018 Bonus Points

100% Emergency Power. Gasoline generator, batteries, and solar cells. No commercial power was used.

Media Publicity. An attached press release was emailed to a local newspaper.

Public Location. We were located in Washington Monument State Park, a recreational area which was in active use by the general public during Field Day weekend.

Public Information Table. ARRL material was displayed and explained to all visitors who stopped by, including Appalachian Trail hikers. Part of the public information included was that this was an emergency communications exercise and that we had been doing this for 48 consecutive years. A visitor's log was kept (31 people).

NTS Message to ARRL SM. Attached

W1AW Field Day Bulletin Received: next page

Formal NTS Messages handled. Attached

Natural Power. Initially discharged batteries were charged with solar cells and subsequently used for the following contacts:

50 MHz SSB: W5JMC W3C W3AC W4RKC K3PZN

Youth Participation Bonus: Dexter (11 years old) and Tony (12 years old) were members of a Boy Scout group who visited; they each made one contact on our GOTA station.

GOTA Bonuses: AG6DF 40; Logan Miller 40

GOTA Coach Bonuses: WA3PYU, K3MZ, W4TG, KN3U, and WA3LTJ coached GOTA operations for 80 more points.

Submitted using the b4h.net applet: July 6, 2018

Educational Activity: K3MZ gave a talk on radio propagation and why it is better to be on top of a mountain; that rain and clouds did not matter to us and about the elevation angle of our signals. He also explained that our signals bounce off the ionosphere. The Boy Scouts constructed straight keys from clothespins.

Site Visit by a rep of an ARES served agency: Craig Kuhn, *American Red Cross* (attached)

Social Media. Our Facebook page solicited visitors:

FOR IMMEDIATE RELEASE
June 28, 2018

Radio Club Participates in "Field Day"

The Randallstown Amateur Radio Club took part in an annual national emergency preparedness test on Saturday and Sunday, June 23rd-24th. The club was founded in 1970 with the opening of Randallstown Senior High School. Over the years the individual members have gone their separate ways and spread out across the country, yet a core group of the original "hams", joined by others attracted to the club, have gotten together every year to participate in the American Radio Relay League's Field Day activity. The annual event has become somewhat of a reunion, being the only time many of the group see one another any longer. This year marks the forty-eighth consecutive year the group has operated the event, and members from California, Florida, Pennsylvania, Virginia, and Maryland were on location.

On the Field Day weekend, thousands of Amateur Radio operators in the U.S. and Canada set up their stations in the open using only emergency power and portable antennas. They contact as many operators as possible in the 24-hour period. These tests are designed to help hams refine operating skills so necessary during disasters and times of emergency when normal channels of communication are disrupted or unavailable.

This year the local club again set up operations in Washington Monument State Park, west of Frederick, at an elevation of 1830 feet. They always seek out high spots in order to strengthen communications -- the group made thousands of contacts with similar groups around the country.

MARTY ARRL MDC SECTION MANAGER

Al Taylor KN3U was our *Safety Officer*. Paul Konigsburg K3MZ was his designated alternate during the time that he was offsite. He reports:

- Safety Officer or a qualified designated assistant/s was on site for the duration of the event.
- Fuel for generator properly stored.
- Fire extinguisher on hand and appropriately located.
- First Aid kit on hand.
- First Aid, CPR and AED trained participant/s on site for full Field Day period.
- Access to NWS alerts to monitor for inclement weather
- Tent stakes properly installed and marked.
- Temporary antenna structures properly secured and marked.
- Site secured from tripping hazards.
- Site is set up in a neat and orderly manner to reduce hazards.
- Stations and equipment properly grounded.
- Access to a means to contact police/fire/rescue if needed.
- Safety Officer is designated point of contact for public safety officials.
- Minimize risks and control hazards to ensure no injuries to public.
- As necessary, monitoring participants for hydration and ensures an adequate water supply is available.

Randallstown Amateur Radio Club

ARRL Field Day – Official Served Agency – American Red Cross Visit

Thank you for inviting your served Agency – The American Red Cross of Greater Chesapeake to view your Field Day Operation.

You showed the capabilities of Amateur Radio to work in less than optimal conditions - and using emergency power. These conditions might very well be present in a real emergency.

What a great way to test and maintain your skills to meet the challenges of emergency communication. You have built our confidence that we could call on you in an emergency coupled with a communication outage or overload.

Thank you for being "Red Cross Ready"

A handwritten signature in dark ink, appearing to read "Craig Kuhn", with a long, sweeping horizontal line extending to the right.

Craig Kuhn, KC3KUH
Disaster Services Technology Regional Program Lead
Greater Chesapeake Region
craig.kuhn@redcross.org
